

Cleaning Instructions

For a correct cleaning process, please follow the instructions below.

Caution! Before getting started, make sure that the machine is unplugged from general switch.

Remove the **feeder plate** by unscrewing the central knob.
Then clean the feeder base with a wet cloth.

Press the front buttons until both parts of the cover are released.

Remove juice tray and PulpOut in one step.

Place on a surface and remove the PulpOut from the tray.

Remove **filter**.

Remove the **tap** pressing softly both sides.

Remove the peel **buckets**.

Remove the **front cover**.

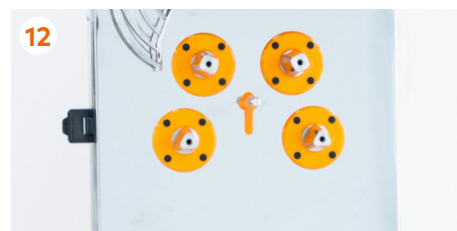

Unscrew the central knob of the **1Step Extraction Kit**.

Remove the **1Step Extraction Kit** by pulling it towards you with the stainless-steel handles.

Assemble the **blade protector** and then remove the **blade** by pulling the handle towards you.

Clean the **front part** of the machine with a soft sponge.

Remove the **anti drop tray and the filter**.

In case of podium models, clean the hopper with a soft sponge.

Take out the waste bin and clean inside the podium, making sure that there is no rest of pulp and peels.

The cleaning process will be explained in details for each one of the machine's components below.

! Cleanliness and hygiene warnings.

Zumex recommends cleaning the machine at least once or twice a day, depending on how much it is used in order to maintain optimal food hygiene conditions.

All the parts, except from the cover and the tap can be put in a **dishwasher** to clean them.

Cleaning of the extraction area and any of its removable parts must be done with a **sponge**. Do not use scouring sponges that could scratch the surfaces.

Use a **degreaser product** for food use to be able to easily remove all traces of pulp and adhering wax. It is necessary to sanitize with a **disinfectant product** after each cleaning.

Rinse with plenty of water after sanitizing, in order to remove any remaining disinfectant.

Replacing parts.

For quick cleaning in the middle of the day, we recommend having a kit with spare parts. This Kit is made up of: a cover, 1Step Extraction Kit, Juice container and Filter.

Daily cleaning

Blade, tap, juice container, filter, drip tray, feeder plate and front cover

Clean piece by piece, by hand or in the dishwasher.

**Check the recommendations regarding parts that can be washed in the dishwasher (pag. 2)*

Clean the **feeding plate** in the dishwasher or with a soft sponge to remove the remaining particles still stuck to it.

Clean the **cover** with a soft sponge to avoid damaging the material. Rinse with plenty of water.

1Step Extraction Kit

For a **quick cleaning**, clean the 1Step Extraction Kit assembled in a single piece under a tap or in a dishwasher.

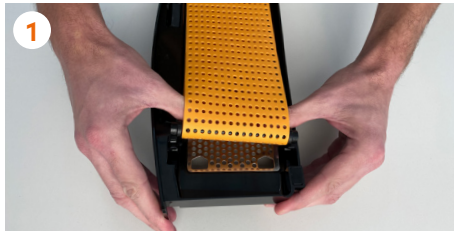

Clean the entire assembly with a sponge and soap in a single piece under a tap. Move the **pressing units** around to make sure that they are completely clean.

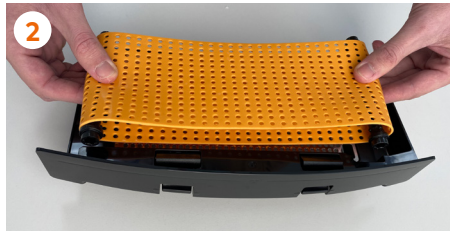

The assembly can also be washed in a single piece in a **dishwasher**.

Cleaning instructions for components

PulpOut System

1 Place the PulpOut system on a smooth surface, place your fingers on the inside of the **sweeping belt roller** and push it outwards to release it.

2 Pull out the **sweeping belt** together with the other roller and remove both parts.

3 Clean **all the parts** with a sponge and soap, rinse after with clean water. All the parts can also be washed in a **dishwasher**.

Recommended cleaning instructions

Midday Cleaning

Cover, 1Step Extraction Kit, Juice container, filter and tap

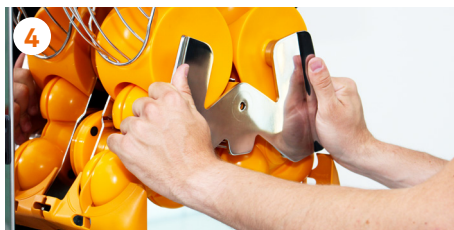

1 Press the front buttons until both parts of the cover are released.

2 Remove juice tray and PulpOut in one step.

3 Remove the **front cover**.

4 Remove 1Step **Extraction kit** and the **blade**.

5 Clean piece by piece, by hand or in the dishwasher.
**Check the recommendations regarding parts that can be washed in the dishwasher (pag. 2)*

Weekly cleaning 1Step Extraction Kit

For deep cleaning, disassemble the 1Step Extraction Kit and clean all the parts

1

Remove the **peel ejectors** located on the sides at the bottom.

2

Unscrew the **knob** located on the lower central part.

3

Lift the stainless-steel **handles**.

4

Remove the **pressing units**.

5

Clean **all the parts** with a sponge and soap, rinse after with clean water. All the parts can also be washed in a **dishwasher**.

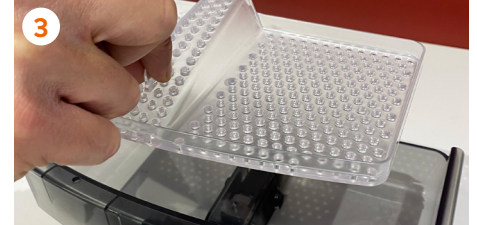

Assembly Instructions

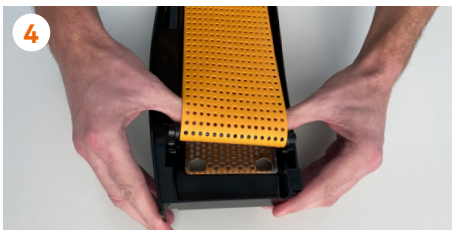

Insert the **juice tray** and the **filter**.

Assemble the **tap**.

Insert the **filter**.

Place the PulpOut filter on a surface. First mount the left roller, insert the second roller and stretch the belt until the roller is mounted in its housing.

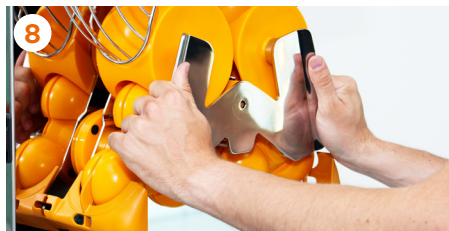

Insert the PulpOut into the holes of the juice tray.

Insert the **blade** pressing towards the machine until notice the clip sound.

Caution! Remove the blade protector before inserting the kit.

Insert 1Step **Extraction kit**

Screw the central knob of the **1Step Extraction Kit**.

Assemble the **front cover**.

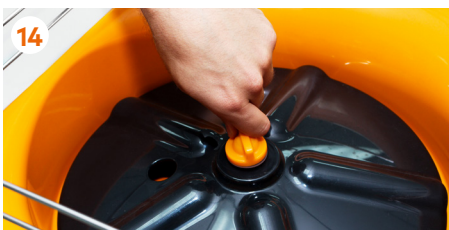

Place the **peel buckets** towards the machine until notice the bucket is in their position.

Insert the juice tray and PulpOut in one step. Hold the container and position it on the guide rails of the cover and push until it is fully inserted.

Press both upper sides of the PulpOut until both buttons move outwards and sit in line with the protruding lines on the front.

Insert the **feeder plate** by screwing the central knob.
